ELSEVIER International Journal of Mass Spectrometry and Ion Processes 133 (1994) 223–225

SUBJECT INDEX

Abundance ratio
Computational procedures for the treatment of measured or published isotope abundance data 65
Aeronomy
Reactions of nitric acid with di- and trichloride ions, di- and triiodide ions and with CO_4^- in the gas phase 13
Alcohol clusters
Collision induced dissociation studies of protonated alcohol and alcohol–water clusters by atmospheric pressure ionization tandem mass spectrometry. Part 2. Ethanol, propanol and butanol 47
Amorphous ice
Negative cluster ion formation from water ice in high electric fields 59
Anion rearrangement
A comparison of skeletal rearrangement reactions of even-electron anions in solution and in the gas phase 1
API-MS–MS
Collision induced dissociation studies of protonated alcohol and alcohol–water clusters by atmospheric pressure ionization tandem mass spectrometry. Part 2. Ethanol, propanol and butanol 47
Appearance energy
Experimental investigation of the electron impact ionization cross-section behaviour near threshold 157
Atomic weight
Computational procedures for the treatment of measured or published isotope abundance data 65
Atoms
Experimental investigation of the electron impact ionization cross-section behaviour near threshold 157

Benzylium
Ion source trapping in conjunction with two sector mass spectrometry: time resolved CAD L11

C_2O_2
The generation of $OC_2O^{\cdot+}$ and OC_2O and a study of ionized OC_3O and C_2O by tandem mass spectrometry 111
C_3O_2
The generation of $OC_2O^{\cdot+}$ and OC_2O and a study of ionized OC_3O and C_2O by tandem mass spectrometry 111
Carbon cluster anions
Photodissociation and photodetachment of small carbon cluster anions 97
Charge-transfer chemical ionization
Ion/molecule reactions with S_2F_{10}: detection of $S_2F_{10}^{\cdot+}$, $S_2F_{11}^+$ and two isomers of SF_5^+ 73
Cluster ions
Infrared laser-induced photofragmentation of size-selected $SF_6 \cdot (CO_2)_n^+$ cluster ions, for n in the range 2–11 83
Cluster ion structure
Collision induced dissociation studies of protonated alcohol and alcohol–water clusters by atmospheric pressure ionization tandem mass spectrometry. Part 2. Ethanol, propanol and butanol 47
Collision cross-sections
Collision cross-sections of [C,H,O] cations and radical cations from aliphatic [C,H,O] compounds 121
Cross sections
Electron impact ionization of the NF_3 molecule 175
Cyclic ions
Collision cross-sections of [C,H,O] cations and radical cations from aliphatic [C,H,O] compounds 121
Cyclotron
An off-center cubic ion trap for Fourier transform ion cyclotron resonance mass spectrometry 29

Deuterated benzenes
Isotopically-selective two-photon ionization of ^{12}C- and ^{13}C-benzene and hexadeuterobenzene in a time-of-flight mass spectrometer 39

Elsevier Science B.V.

Double-charge transfer
Further information on triplet-state energies of the ethane dication L1

Electron impact ionization
Electron impact ionization of the NF_3 molecule 175
Electron impact induced production and isotope-resolved identification of C_{70}^{6+} and sextuply-charged fragment ions of C_{70} and C_{60} L5
Experimental investigation of the electron impact ionization cross-section behaviour near threshold 157
Electrospray
Secondary electron resolved mass spectrometry of electrosprayed ions 141
Ethane dication
Further information on triplet-state energies of the ethane dication L1

Fast GC–MS
Fast, high temperature and thermolabile GC–MS in supersonic molecular beams 187
Field desorption microscopy
Negative cluster ion formation from water ice in high electric fields 59
Field electron emission
Negative cluster ion formation from water ice in high electric fields 59
Flow tube
Reactions of nitric acid with di- and trichloride ions, di- and triiodide ions and with CO_4^- in the gas phase 13
Fourier transform ion cyclotron resonance
Photodissociation and photodetachment of small carbon cluster anions 97
Fragmentation
Collision induced dissociations of deprotonated peptides. Dipeptides and tripeptides containing proline 165
Fragmentation mechanisms
Collision cross-sections of [C,H,O] cations and radical cations from aliphatic [C,H,O] compounds 121
Fullerenes
Electron impact induced production and isotope-resolved identification of C_{70}^{6+} and sextuply-charged fragment ions of C_{70} and C_{60} L5

Gas phase versus solution
A comparison of skeletal rearrangement reactions of even-electron anions in solution and in the gas phase 1

Heteroclusters
Collision induced dissociation studies of protonated alcohol and alcohol–water clusters by atmospheric pressure ionization tandem mass spectrometry. Part 2. Ethanol, propanol and butanol 47

Ion injection
An off-center cubic ion trap for Fourier transform ion cyclotron resonance mass spectrometry 29
Ion/molecule reactions
Reactions of nitric acid with di- and trichloride ions, di- and triiodide ions and with CO_4^- in the gas phase 13
Isotope abundance
Computational procedures for the treatment of measured or published isotope abundance data 65

$[M-H]^-$ ions
Collision induced dissociations of deprotonated peptides. Dipeptides and tripeptides containing proline 165
Macromolecule
Secondary electron resolved mass spectrometry of electrosprayed ions 141
Magnetron
An off-center cubic ion trap for Fourier transform ion cyclotron resonance mass spectrometry 29
Mass spectrometry
Experimental investigation of the electron impact ionization cross-section behaviour near threshold 157
Mass spectrum
Secondary electron resolved mass spectrometry of electrosprayed ions 141
MIKES
Infrared laser-induced photofragmentation of size-selected $SF_6 \cdot (CO_2)_n^+$ cluster ions, for n in the range 2–11 83
Molecules
Experimental investigation of the electron impact ionization cross-section behaviour near threshold 157
Multiphoton ionization
Isotopically-selective two-photon ionization of ^{12}C- and ^{13}C-benzene and hexadeuterobenzene in a time-of-flight mass spectrometer 39
Multiply-charged cations
Electron impact induced production and isotope-resolved identification of C_{70}^{6+} and sextuply-charged fragment ions of C_{70} and C_{60} L5

Negative ions
Collision-induced electron emission from surfaces in negative-ion time-of-flight mass spectrometry 211

Negative water cluster ions
Negative cluster ion formation from water ice in high electric fields 59
Neutralization–reionization mass spectrometry
The generation of $OC_2O^{\cdot+}$ and OC_2O and a study of ionized OC_3O and C_2O by tandem mass spectrometry 111

Photodetachment
Photodissociation and photodetachment of small carbon cluster anions 97
Photodissociation
Photodissociation and photodetachment of small carbon cluster anions 97
Photofragmentation
Infrared laser-induced photofragmentation of size-selected $SF_6 \cdot (CO_2)_n^+$ cluster ions, for n in the range 2–11 83
Plasma processing
Electron impact ionization of the NF_3 molecule 175
Proline di- and tripeptides
Collision induced dissociations of deprotonated peptides. Dipeptides and tripeptides containing proline 165
Proportional counter
Isotopically-selective two-photon ionization of ^{12}C- and ^{13}C-benzene and hexadeuterobenzene in a time-of-flight mass spectrometer 39
Proton-bound dimers
Collision cross-sections of [C,H,O] cations and radical cations from aliphatic [C,H,O] compounds 121
Protonated clusters
Collision induced dissociation studies of protonated alcohol and alcohol–water clusters by atmospheric pressure ionization tandem mass spectrometry. Part 2. Ethanol, propanol and butanol 47

Quadrupole
An off-center cubic ion trap for Fourier transform ion cyclotron resonance mass spectrometry 29
Quasi-equilibrium theory
Collision cross-sections of [C,H,O] cations and radical cations from aliphatic [C,H,O] compounds 121

Rate constants
Reactions of nitric acid with di- and trichloride ions, di- and triiodide ions and with CO_4^- in the gas phase 13
Resonance enhancement
Isotopically-selective two-photon ionization of ^{12}C- and ^{13}C-benzene and hexadeuterobenzene in a time-of-flight mass spectrometer 39

Secondary electron emission
Collision-induced electron emission from surfaces in negative-ion time-of-flight mass spectrometry 211
Secondary electron resolved mass spectrometry of electrosprayed ions 141
Sequence determination
Collision induced dissociations of deprotonated peptides. Dipeptides and tripeptides containing proline 165
Space charge
An off-center cubic ion trap for Fourier transform ion cyclotron resonance mass spectrometry 29
Space charge trapping
Ion source trapping in conjunction with two sector mass spectrometry: time resolved CAD L11
Sulfur decafluoride
Ion/molecule reactions with S_2F_{10}: detection of $S_2F_{10}^{\cdot+}$, $S_2F_{11}^+$ and two isomers of SF_5^+ 73
Supersonic molecular beams
Fast, high temperature and thermolabile GC–MS in supersonic molecular beams 187

Tandem mass spectrometry
The generation of $OC_2O^{\cdot+}$ and OC_2O and a study of ionized OC_3O and C_2O by tandem mass spectrometry 111
Time of flight
Isotopically-selective two-photon ionization of ^{12}C- and ^{13}C-benzene and hexadeuterobenzene in a time-of-flight mass spectrometer 39
Time resolved CAD
Ion source trapping in conjunction with two sector mass spectrometry: time resolved CAD L11
Time-of-flight mass spectrometry
Collision-induced electron emission from surfaces in negative-ion time-of-flight mass spectrometry 211
Toluene
Ion source trapping in conjunction with two sector mass spectrometry: time resolved CAD L11
Tropylium
Ion source trapping in conjunction with two sector mass spectrometry: time resolved CAD L11

Uncertainty calculation
Computational procedures for the treatment of measured or published isotope abundance data 65
